## Accessing your eScout quarantined mail and settings

To access your eScout mail quarantine, please login with your email credentials to your eScout interface at https://e-scout.domain.com and click on the eScout tab. Once there, you v options to view and manage your spam quarantine as well as change your mail filtering settings.

## Suspected Spam / Suspicious Attachments / Viruses

The first four tabs of the eScout panel hold your suspected delivered messages, spam messages, messages with suspicious file attachments, and known viruses. eScout is a learnin improves its accuracy over time, and one way to help train it is by confirming known good mail, known SPAM/Virus messages or rescuing email that has been quarantined incorrectly email is rescued from eScout, it is immediately delivered to your Inbox. When an email is confirmed as SPAM, it is learned and removed from eScout.

## **Editing White/Black Lists**

If you are experiencing repeat problems with known domains or senders, you can add them to your white list to ensure that all messages are promptly delivered to your Inbox. You ca complete email addresses, or partial matches, i.e. @domain.com. The same holds true for adding senders/domains to the black list to ensure that no messages from these sources a to your Inbox.

## Accessing and modifying settings

eScout filtering strength is automatically preset to a moderate level. You can, however, adjust the SPAM protection levels to your preferences.

Current SPAM Protection         Choose one of the below settings to increase or decrease the aggressiveness of your e-Scout quarantine. High settings are perfectly safe. You may occasionally encounter a legitimate message quarantined by mistake. Simply rescue the quarantined message to tell e-Scout that mail from this sender is legitimate; e-Scout will deliver the message and remember your choice when scanning future messages.         Off       Off         Low (Blocks the least SPAM)       • Medium (Balanced)         High (Blocks the most SPAM)       • Viruses blocked for You         1085726 Spam items blocked systemwide       • Viruses blocked systemwide
